Letter of Recommendation

It gives me immense pleasure to write this recommendation letter for Mr. Henil Doshi, who aspires to pursue a graduate program at your university. I have known him for almost one year now and have taught him the subject of Advanced Java. I have also supervised his lab sessions and have found him to be one of the most enthusiastic students during practical sessions. Besides, I am also guiding him on his final year major project.

Henil is quite familiar with the concepts and complexities of Advanced Java and is able to aptly apply these concepts in his projects. He is working on a machine learning based project named Intelligent Traffic Surveillance System. In this group project, Henil is working on both, front-end and back-end of the system and is regularly completing the modules. He also made a detailed report on the project which aims at creating a system that detects the number of vehicles that are available on a particular lane and according to those numbers the system sets the timer for waiting at the traffic signal. The project aims at saving more time. He and his team members are working very well on this project and with their efforts and dedication, the project is expected to be completed on time.

In class, Henil actively participated during discussions and performed well in the subject taught. He has a sound technical knowledge and I have often observed him helping his peers during lab sessions. Also, he is quite inquisitive in nature and often ventured beyond books to gain knowledge. In 4th semester, he along with his friends made a poster on Data Structure Queue. They presented the poster, explaining about Queue, in front of the whole class and faculty members. After the presentation, Henil successfully handled the questions and answers sessions.

I believe, he is well-suited to undertake a challenging graduate program of study and I am confident that he will be an asset to your university. Thus, I wholeheartedly recommend him for admission and would be glad to provide any further information required to assess his candidature.

Sincerely,

Prof. Nisarg Patel (nisarg.patel_ljiet@ljinstitutes.edu.in)

Assistant Professor
